

Press Release

Zug, 1 February 2011

HBM BioVentures realises a profit of EUR 41.9 million through the sale of PharmaSwiss to Valeant

- Increase in HBM BioVentures' net asset value (NAV) of CHF 2.97 per share, or 5.0%
- Cash proceeds of EUR 96.5 million (approx. CHF 125 million)

Largest private portfolio company PharmaSwiss will be acquired by Valeant in an all cash transaction at an equity value of EUR 350 million. The acquisition of PharmaSwiss solidifies Valeant's position as a leading pharmaceutical company in Central and Eastern Europe. This transaction increases HBM BioVentures' net assets by CHF 28.8 million (CHF 2.97 per share), a 5.0% appreciation, and will generate a cash inflow at closing of EUR 93.6 million (approx. CHF 120 million). In total HBM BioVentures will realise a profit of EUR 41.9 million on its investment in PharmaSwiss.

Valeant Pharmaceuticals International, Inc. (NYSE/TSX: VRX) and PharmaSwiss SA announced today the signing of a binding agreement for Valeant to acquire all issued shares of PharmaSwiss at an equity value of EUR 350 million. The purchase price is payable in cash: 97% of the sum is due at closing and the remainder after escrow releases. The closing is expected in the first or second quarter 2011, subject to customary closing conditions, including certain regulatory approvals.

In June 2007, HBM BioVentures invested EUR 54.6 million in PharmaSwiss. When the investment was made, the company had no need for capital. Still, after more than two years of interaction with the founders, they were interested in bringing a value-adding investor on board to accelerate the company's expansion. HBM BioVentures has been an active and very engaged investor at PharmaSwiss with Dr. Andreas Wicki as board member and Dr. Matthias Fehr and Lars-Kristian Bråten as board observers.

One year after HBM BioVentures's investment, in May 2008, Polish Enterprise Fund VI, a private equity fund managed by Enterprise Investors, invested EUR 35 million in PharmaSwiss, enabling HBM BioVentures to increase the valuation of its investment by 35.8%. Including this appreciation, HBM BioVentures can record a net profit of EUR 41.9 million, or 1.8 times the invested capital, representing an annualized return of 16%.

Dr. Andreas Wicki, CEO of HBM BioVentures, comments: "HBM BioVentures was invited to become an investor in PharmaSwiss due to its industry expertise and network, as well as the willingness to be a minority investor in a company controlled by the founders. During the investment period, HBM BioVentures has been an active contributor at the

board level. Furthermore, when requested by management, we have assisted in business development, transaction support and by increasing the visibility of PharmaSwiss as a company. This transaction demonstrates the increased maturity and value creation in the HBM BioVentures portfolio over the past years.”

PharmaSwiss has a broad product portfolio in seven therapeutic areas and operations in nineteen countries throughout Central and Eastern Europe, including Poland, Hungary, the Czech Republic and Serbia. The company also has operations in Greece and Israel. In addition, PharmaSwiss is an existing partner to several large pharmaceutical and biotech companies offering regional expertise in such functions as regulatory, compliance, sales, marketing and distribution. Since HBM BioVentures’s investment in 2007, PharmaSwiss has made good progress, expanding its operations from 12 to 19 countries, doubling the number of employees to more than 750 and increasing net revenues from EUR 100 to approximately EUR 180 million.
